CLAIMS

2

Having thus described the invention, what is claimed as new and desired to be secured

3

by Letters Patent is as follows:

4

1 1. A method of washing utensils in a pot and pan washing machine, the pot and pan
2 washing machine including a plurality of nozzles each supplying a jet stream of water within
3 the washing machine, each jet stream deflecting from at least one wall of the washing machine
4 to provide a washing action, said method comprising the steps of:
5 isolating a portion of the washing machine; and
6 capturing at least a substantial portion of the jet stream from at least one of the
7 plurality of nozzles within said isolated portion of the washing machine while
8 at least substantially maintaining the jet stream deflection of the washing
9 machine to provide a washing action within said isolated portion of the
10 washing machine.
